

We are championing legislation across the country to implement **cardiac emergency response plans in schools, school athletics, and state appropriations to support implementation**. As a founding member of the Smart Heart Sports Coalition, established by the NFL, we're pushing for public policies that prevent fatal outcomes from sudden cardiac arrest.

THIS MAP IDENTIFIES WHERE THE FOLLOWING POLICIES HAVE BEEN ENACTED:

Cardiac Emergency Response Plans in Schools

- Require schools to establish cardiac emergency response plans, CPR training and AED placement

Cardiac Emergency Response Plans for School Athletics

- Plans for each high school athletic venue that are widely distributed, posted, rehearsed and updated annually
- Clearly marked AEDs at each athletic venue or within 1-3 minutes of each venue where high school practices or competitions are held
- CPR and AED training for coaches

 Identifies states awaiting signature on one or more of the policies listed above
